

# YP96 Series Cutting Hydraulic Press

## ✧ What is cutting hydraulic press?

YP96 servo auto trim hydraulic press is mainly applied to cutting and punching process in automotive interior industry, like the trimming and punching of car roof, carpet, seat, fender, and trunk and so on. It adopts servo oil-electrical system, and it is energy saving, stable and reliable. The holding time and working speed can be customized according to customers' requirement based on different process of materials in order to help them improve working efficiency and product quality.

## ✧ Main features

- Standardized hydraulic system and fuel tank design
- Standardized electrical panel and PLC control program
- Standardized operation mode: manual, semi-automatic, full-automatic
- Standardized Auxiliary core cylinder oil line
- Standardized brand configuration of components
- High efficient and energy saving

## ✧ Parameters

Pressure	Ton	150	200	250	300	400
Daylight	Mm	1400	1600	1600	1800	1800
Stroke	Mm	1200	1400	1400	1600	1600
Table sizes	Mm	2400×1500	2400×1500	2600×1800	2600×1800	2800×2000
Fast down speed	Mm/s	300	300	300	300	300
Pressing speed	Mm/s	10-30	10-30	10-30	10-30	10-30
Fast return speed	Mm/s	150	150	150	150	150
Power	kW	≈20	≈23	≈23	≈29	≈44
